Leaders in ICT, Security Systems, Audio Visual, Lighting, and
Home automation System for residential and commercial building

OVER 25 YEARS OF EXPERIENCE IN THE INDUSTRY

www.arawk.com

ABOUT US

AHMED RASHED AHMED TECHNICAL WORK LLC (ARA). a privately-owned company based in Dubai with over 25 years of experience in providing Low Current System Solutions. We currently operate Dubai, Sharjah, and Ajman.

Drawing on our extensive professional staff and experience, we can identify, deliver and install the most appropriate security solution system to match your requirements for both commercial and domestic sectors.

We strive to deliver and satisfy all our customer needs by offering state-of-the-art equipment and the latest technologies. We have built our business on our reputation and word of mouth from our existing customers.

Our valuable and extensive list of customers ranges from Banks, Exchange Shops, Hotels, Residential, Retail, Hospitals, Schools, to detention facilities.

For **ARA**, sustainability means securing the company's long-term success while at the same time, helping protect the environment for current and future generations. Hence the necessity to take up the challenges of innovation and to respond to market needs as a diversified and multi-faceted company.

COMPANY MISSION VISION & VALUES...

Our team of experts have the expertise to deliver, deploy and maintain optimum, scalable and cost-effective solutions to our customers.

OUR CORE VALUES

At **ARA**, we value quality partnerships, integrity and exceptional customer service. We are focused on building sustainable, long-term relationships with our customers, employees and suppliers

VISION

ARA vision is to be recognized as the most professional and reliable ICT, Security Systems, Audio Visual, Lighting, Home Automation Information and Communication Solutions leader in the industry by exceeding our customers' expectations.

MISSION

ARA mission is to exceed our client's specific and customized ICT, Security Systems, Audio Visual, Home Automation, Information and Communication Solutions needs by delivering the highest quality of professional services

OUR SERVICES & **SOLUTIONS**

SECURITY SOLUTIONS

Security Solutions has developed a new standard of premium security services. With a multi-disciplinary approach, every client requirement, whether private or business, is fulfilled with years of technical know-how and expertise. There is no safer way to protect yourself, your property or your assets.

The Security Solutions division has been delivering the best quality solutions to customers in the UAE for more than 25 years now. We have implemented Security Solutions for some of the largest and the most prestigious projects in the UAE. Our team of experts have the expertise to deliver, deploy and maintain optimum, scalable and cost-effective solutions to our customers.

SECURITY SURVEILLANCE SYSTEM (APPROVED FROM SIRA)

We specialize in the design, installation, repair, and maintenance of a wide range of security systems for commercial and residential properties, as well as industrial sites in the UAE. For all applications and sectors, we strive to provide high-quality products, Video Guard, Eguard SIRA Alarm police connectivity SIRA License renewal, SIRA Approved NVR DVR great service, and innovative security solutions. Our security cameras and equipment are all built using cutting-edge technology and high-quality components. Consult one of our security specialists to choose the best security systems for your business or property, and you'll have years of reliable surveillance protection.

We take pleasure in offering the best customer service in the industry. Our employees are always being trained in order to provide the finest possible client service. Our team, which includes installation and service experts as well as customer support and central station operators, remains on top of industry goods, trends, and best practices. You get our help when you need it.

VIDEO MANAGEMENT SYSTEM (VMS)

APPROVED & CERTIFIED FROM SIRA

The VMS software improves central Video Management Server (VMS) and integrates related hardware. This highly effective platform delivers data and intelligence via a pre-installed VMS on standard, off-the-shelf servers.

VMS represents a new breed of video surveillance components, offering customers what they need to deploy any of a multitude of smart applications over a wide expanse of industries. VMS enhances user benefits, and delivers extensive benefits across a wide range of vertical markets.

VIDEO GUARD

Video Guard is a device for connecting a company's electronic surveillance system to SIRA's computer network. As you may know, SIRA is a government agency responsible for all things related to security within Dubai. SIRA has made the installation of Video Guard a compulsory requirement for companies working in some specific sectors in Dubai.

AUTOMATIC NUMBER PLATE RECOGNITION SYSTEM (ANPR)

Automatic number-plate recognition (ANPR) is a technology that uses optical character recognition on images to read vehicle registration plates to create vehicle location data. It can use existing closed-circuit television, road-rule enforcement cameras, or cameras specifically designed for the task. ANPR is used by police forces around the world for law enforcement purposes, including to check if a vehicle is registered or licensed. It is also used for electronic toll collection on pay-per-use roads and as a method of cataloguing the movements of traffic, for example by highways agencies.

2. STRUCTURE CABLING SYSTEM:

DU & ETISALAT APPROVED

ACCESS CONTROL SYSTEM

Access control systems (ACSs) rely on administrator-defined rules that allow or restrict user access to protected network resources. These access rules can, for example, require strong user authentication such as tokens or biometric devices to prove the identity of users requesting access.

GATE BARRIER SYSTEM

GATE BARRIER SYSTEM

HOME & HOTEL AUTOMATION

- 1** A smart home system is a system that has been set up to control your household appliances either by remote, voice commands or by programming them to complete specific tasks at a specific time.
- 2** Smart Home Devices include smart kitchen appliances such as refrigerators and electronic smart home products such as intelligent light switches, smart speakers, smart air conditioning, or smart CCTV.
- 3** Smart Home hubs or universal remotes can be used as a centralized control center for smart home devices and will even allow smart devices to communicate data to other units on the same network!
- 4** Examples of Smart Home Hubs you might be familiar with include Alexa, Google Assistant, and Google Home Hub.

WORKING STYLE METHODOLOGY

DESIGN AND CONSULTANCY

We work closely with Consultants and End Users to meticulously gather requirements and translate their high level requirements into a documented turn key design which can serve as a reference for all future project phases.

ARA is equipped with a professional technical team that has a track record of proven experience working not only with End Users and Consultants, but also with Main Contractors, MEP Contractors and Interior Designers. The result is a turn key design that accommodates con-siderations and requirements from all parties involved in a project.

Our team also works hand in hand with Consultants in preparation of product Specification Documents and Tenders.

PROJECT MANAGEMENT

Upon Award of the project, the ARA technical team engages the Main Contractor, MEP Contactor, and Interior Designer in a kick off meeting to discuss all sites pre requisites where applicable.

All necessary documentation such as detailed designs and CAD drawings are geneated to reflect all agreed upon or asbuilt requirements.

A dedicated ARA project manager is assigned to each project in order to consult and supervise provisioning work executed by the Main Contractor and MEP Contractor.

PROJECT EXECUTION

Before starting with the project execution phase, a project progress report is also created to reflect timeline, deliverables, and tasks required to complete the project. This report would be updated on a weekly or bi-weekly basis

A skilled team of ARA engineers and technicians install all hardware, commission all active and passive equipment, conduct stress testing on installed devices and systems, and finally proceed to the programming phase of a project. .

Before handing over, the Client is involved in a customization stage where the solution is presented and then tweaked based on the Client's feedback. Upon completing

AFTER SALE SERVICES

OUR SERVICES

AFTER SALES SERVICE:

ARA Technical Works prides itself with its Annual Maintenance Program (AMP) that aims at continuously adding value to any Client deployment by remote support, troubleshooting services, on-site support, preventative maintenance, as well as software upgrades that will ensure any installed system is always up to date with the latest features in the industry.
